### **Election/Restrictions**

Claims **1 – 100** are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I.** Claims **1 – 50**, drawn to a semiconductor device, classified in class **257**, subclass **773**.

**Group II.** Claims **51 – 100**, drawn to process of making a semiconductor device, classified in class **438**, subclass **666**.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be use to make other and materially different product or by hand, or (2) that process as claimed can be made by another and materially different process. (MPEP § 806.05(f)). In the instance case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group II invention could be made by the processes materially different from those of the group I invention, for example, in claim 20, **the limitations disclosed in group II invention are not disclosed in group I invention, for example**, aligning an electronic circuit package with receptacle and at least one insertable having an opening

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

4. This application also contains claims directed to the following patentably distinct species of the claimed invention:

- a) Species I, e.g. Figures 1A – 1I**
- b) Species II, e.g. Figures 2A – 2C**
- c) Species III, e.g. Figures 3A – 3C**
- d) Species IV, e.g. Figure 4**
- e) Species V, e.g. Figure 6**
- f) Species VI, e.g. Figures 7A – 7H**
- g) Species VII, e.g. Figures 8A – 8G**
- h) Species VIII, e.g. Figure 9**
- i) Species IX, e.g. Figure 10A**
- j) Species X, e.g. Figure 10B**
- k) Species IX, e.g. Figures 11A – 11C**

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is all claims are generic is considered non-responsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species.

M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patent-able distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions un-patent-able over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor-ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor-ship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
